June 10, 2009

Roger Bell
City of Covington Housing Development Department
2300 Madison Avenue
Covington, Kentucky 41014

Dear Roger,

Bayer Becker has asked me to provide a reference regarding the Housing Development Departments RFQ for property surveying services required for the Neighborhood Stabilization Program. I have had the opportunity to work with Bayer Becker since I took the office of City Engineer in 2004, and believe they would be an excellent choice for the project. As City Engineer, we have collaborated on several projects which include the Streetscape project along Madison Avenue and Pike Street, the new St. Elizabeth Hospital, the floodwall recertification survey, and most recently, the Hands Pike Park parking addition. Regardless of the size, complexity or scope of the project, their staff of surveyors and engineers have always been extremely professional, technically proficient, and a pleasure to work with.

With regards to scope of services outlined in your RFQ, I believe that Chris Gephart and the survey team at Bayer Becker have the local knowledge and experience required to complete all of the types of surveying work outlined in an efficient and effective manner. They use state of the art GPS and robotic surveying equipment, and have multiple offices and survey crews to draw from on larger projects. Their ability to provide precise, accurate, timely and cost effective data, plus the sheer amount of prior work within the city, makes them a good fit. Feel free to call me if you need more details.

Sincerely,

A handwritten signature in blue ink, appearing to read "T. Logan", written over a horizontal line.

Thomas H. Logan, PE
Department of Public Improvements Director/City Engineer
