Ricardo Smith

Chief of Fire/EMS
Regis Huth

Public Works Director
Dennis Finke

City Engineer
Bayer Becker

To whom it may concern,

The city of Park Hills has had the great fortune of having Bayer Becker serve as the city engineer since 1993. The city has benefitted from their integrated services; civil and transportation engineering, landscape architecture and land surveying. Over that time, as citizen, councilman and now ten years as Mayor, I have first hand knowledge of their expertise, responsiveness, attention to detail, and professionalism. They are innovators, staying on the forefront of the latest technologies and design techniques in the public infrastructure arena including water quality features.

The types of projects that Bayer Becker has been involved with locally include rain gardens, green roofs, wetlands and extended detention basins. Bayer Becker has and will continue to play a vital role in the city's long term plans for green infrastructure initiatives in our street reconstruction, public properties, and park projects.

Sincerely,

Michael J. Hellmann
Mayor
Park Hills, Kentucky
